Re: *Time I told you so...*

Since 1998, NTech has provided us with web services and technology support for various projects. Your expertise and knowledge particularly in the search engine arena have been the basis for our continuing relationship. And as good as you are, I don't think you can dummie up those Traffic Reports. They speak volumes in plain English and help me understand why we get an impressive number of leads.

You know what you're doing; you stay on top of what's new; you are always accessible and keen to improve the effort.

That's why I choose NTech for these active sites:

www.pitstoptour.com

www.whitlockmotorsports.com

www.dodgetrucksuperstore.com

And that's why I recommend NTech to my friends and associates.

Keep up the 'good stuff'...

db
